## Approval of Annual Financial Statements

---

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the financial statements and was given unrestricted access to all financial records and related data.

The financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that he is ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the municipality's cash flow forecast for the year to June 30, 2013 and, in the light of this review and the current financial position, he is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

The municipality is wholly dependent on Grants for continued funding of operations. The financial statements are prepared on the basis that the municipality is a going concern and that the Jozini Local Municipality has neither the intention nor the need to liquidate or curtail materially the scale of the municipality.

Although the accounting officer are primarily responsible for the financial affairs of the municipality, they are supported by the municipality's external auditors.

The external auditors are responsible for independently reviewing and reporting on the municipality's financial statements. The financial statements have been examined by the municipality's external auditors and their report is presented on page 6.

The financial statements set out on pages 6 to 43, which have been prepared on the going concern basis, were approved by the accounting officer on 30 August 2013 and were signed on its behalf by:

---

**Accounting Officer**

# **Jozini Local Municipality**

(Registration number KZ272)

Financial Statements for the year ended June 30, 2013

## **Audit Committee Report**

---

We are pleased to present our report for the financial year ended June 30, 2013.

### **The effectiveness of internal control**

We are pleased to report that although internal controls were initially flawed in other respects, the council took audit committee recommendations and the controls were strengthened and became effective till the end of financial year.

### **Evaluation of financial statements**

The audit committee has:

- reviewed the entities compliance with legal and regulatory provisions; the draft financial statements in the main, fairly represents the status core of the municipality

## **Accounting Officer's Report**

---

The accounting officer submits his report . As required in terms of the MFMA ( act 56 of 2003) as the accounting officer of Jozini Municipality I am proud to present herewith annual financial statements for the period ending 30 June 2013

It is my view that the Annual financial statement fairly represent the true financial position of the entity and all the records to support the same are available for inspection

I am of the opinion that based on the information provided to me by management and internal audit the systems of internal control provides reasonable assurance that the financial records may be relied on for the preparation and submission of these annual financial statements

I have reviewed the Municipality's cash forecast for the year ending 30 June 2013 and in light of this review and the current financial position am satisfied that the Municipality has access to adequate resources to fulfil all its obligations as required by various provisions of legislations

Municipal Manager

## Accounting Policies

---

### 1. Basis of presentation

The financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

These financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention unless specified otherwise. They are presented in South African Rand.

The Accounting policies are consistent with the previous period,

#### **Presentation of currency**

These AFS are presented in the South African rand, which is the functional currency of the Municipality.

#### **Going concern assumption**

These Annual Financial Statements have been prepared on the assumption that the municipality will continue to operate as a going concern for at least the next 12 months

#### **Comparative information**

Budget information in accordance with GRAP 1 and 24, has been provided in the face of Statement of comparison between budget and actual information

When the presentation or classification of items in the annual financial statements is amended, prior period comparative amounts are restated. The nature and reason for the reclassification is disclosed. Where accounting errors have been identified in the current year, the correction is made retrospectively as far as practicable, and the prior year comparatives are restated accordingly.

Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly

GRAP standards issued and effective

GRAP 1-Presentation of Financial Statement ( as revised in 2010)

GRAP 2-Cash flow statement ( as revised in 2010)

## Accounting Policies

---

### 1.1 Property, plant and equipment

#### Initial Recognition

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one year. Items for property plant and equipment are initially recognised as assets on acquisition date and are initially recorded at cost. The cost of an item of property plant and equipment is the purchase price and other costs attributable to bring asset to the location and condition necessary for it to be capable of operating in the manner intended by the municipality. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary costs of dismantling and removing the asset and restoring the site on which it is located. When significant components of the Property, plant and equipment has useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one year

The cost of an item of property, plant and equipment is recognised as an asset when:

- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

Where an asset is acquired at no cost, or for a nominal cost, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

Major spare parts and servicing equipment qualify as property plant, and equipment where the municipality expects to use them during more than one period. Similarly, if the major spare parts and servicing equipment can be used only in connection with an item of property plant and equipment, they are accounted for as property plant and equipment.

#### Subsequent measurements-cost model

Subsequent to initial recognition, items of property plant and equipment are measured at cost less accumulated depreciation and impairment losses or at fair market value. Land is not depreciated as it deemed to have an indefinite useful life.

Where the municipality replaces parts of an asset, it derecognises the part of that asset being replaced and capitalises the new component. Subsequent expenditure incurred on an asset is capitalised when it increases the capacity or future economic benefits associated with the asset.

When an item of property, plant and equipment is revalued, any accumulated depreciation at the date of the revaluation is restated proportionately with the change in the gross carrying amount of the asset so that the carrying amount of the asset after revaluation equals its revalued amount.

Depreciation and impairment.

Depreciation is calculated on the depreciable amount, using the straight-line method over the estimated useful lives of the assets. The annual depreciation rates are based on the following estimated average asset lives:

Classes of Assets	Average useful life
Land	
• Landfill site	15 Years
• Parkhomes	10 Years
Infrastructure	
• Buildings	30 Years
• Roads and Pavements	30 Years
• Storm water Drainage	20 Years
• Community Assets Buildings	30 Years

### 1.1 Property, plant and equipment (continued)

• Parkings and gardens	10 Years
• Recreational facilities	30 Years
Furniture and fixtures	
• Furniture and fittings	5 Years
• Bins and Containers	5 Years
Motor vehicles	
• Other Vehicles	5 Years
Office equipment	
• Office Equipment	5 Years
• Computer Equipment	5Years

Items of Property plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

### 1.2 Intangible assets

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

### 1.3 Financial instruments

#### Initial recognition and measurement

Financial instruments are measured initially at fair value, except for equity investments for which a fair value is not determinable, which are measured at cost and are classified as available-for-sale financial assets.

For financial instruments which are not at fair value through surplus or deficit, transaction costs are included in the initial measurement of the instrument.

Transaction costs on financial instruments at fair value through surplus or deficit are recognised in surplus or deficit.

Regular way purchases of financial assets are accounted for at .

(Registration number KZ272)

Financial Statements for the year ended June 30, 2013

## Accounting Policies

---

### 1.3 Financial instruments (continued)

#### Subsequent measurement

Financial instruments at fair value through surplus or deficit are subsequently measured at fair value, with gains and losses arising from changes in fair value being included in surplus or deficit for the period.

Financial Assets are categorised according to their nature as either financial assets as fair value through profit or loss, held to maturity, loans and receivable for sale. Financial liabilities are categorised as either at fair value through profit or loss or financial liabilities carried at amortised cost (' other"). The subsequent measurement of financial assets and liabilities depends on this categorisation as per GRAP standard 104

#### Investments

The fair values of quoted investments are based on current bid prices. If the market for a financial asset is not active (and for unlisted securities), the municipality establishes fair value by using valuation techniques. These include the use of recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, and option pricing models making maximum use of market inputs and relying as little as possible on entity-specific inputs.

Where investments have been impaired, carrying value is adjusted by the impairment loss, which is recognised as an expense in the period that the impairment is identified, impairments are calculated as being the difference between the carrying amount and the present value of the expected future cash flows flowing from the instrument. On disposal of an investment, the difference between the net disposal proceeds and the carrying amount is charged or credited to the statement of financial performance.

#### Receivables from exchange transactions

Trade receivables are measured at initial recognition at fair value, and are subsequently measured at amortised cost using the effective interest rate method. Appropriate allowances for estimated irrecoverable amounts are recognised in surplus or deficit when there is objective evidence that the asset is impaired. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments (more than 30 days overdue) are considered indicators that the trade receivable is impaired. The allowance recognised is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the effective interest rate computed at initial recognition.

Trade and other receivables are categorised as financial assets: loans and receivables and initially recognised at fair value and subsequently carried at amortised cost. Amortised cost refers to the initial carrying amount, plus interest, less repayments and impairments. An estimate is made for doubtful receivables based on the review of all outstanding amounts at year end. Significant financial delinquency in payments ( more than 30 days overdue) are considered indicators that trade receivables is impaired. Impairments are determined by discounting expected future cash flows to their present value. e.g. as the Municipality we have resolved by waiving the interest for all our customers should they come to prove that they are willing to pay

The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the deficit is recognised in surplus or deficit within operating expenses. When a trade receivable is uncollectible, it is written off against the allowance account for trade receivables. Subsequent recoveries of amounts previously written off are credited against operating expenses in surplus or deficit.

Trade and other receivables are classified as loans and receivables.

#### Payables from exchange transactions

Trade payables are initially measured at fair value, and are subsequently measured at amortised cost, using the effective interest rate Method.

Financial liabilities consist of trade and other payables. They are categorised as financial liabilities held at amortised cost, are initially recognised at fair value and subsequently measured at amortised which is initially carrying amount, less repayments, plus interest.

Financial Statements for the year ended June 30, 2013

## Accounting Policies

---

### 1.3 Financial instruments (continued)

#### Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and demand deposits, and other short-term highly liquid investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value. These are initially and subsequently recorded at fair value.

### 1.4 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

#### Municipality as a lessee

Finance revenue is recognised based on a pattern reflecting a constant periodic rate of return on the municipality's net investment in the finance lease.

#### Municipality as a lessor

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the .

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

#### Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

The aggregate cost of incentives is recognised as a reduction of rental revenue over the lease term on a straight-line basis.

The aggregate benefit of incentives is recognised as a reduction of rental expense over the lease term on a straight-line basis.

Income for leases is disclosed under revenue in statement of financial performance.

#### Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

### 1.5 Impairment of cash-generating assets

Cash-generating assets are those assets held by the municipality with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

# Jozini Local Municipality

(Registration number KZ272)

Financial Statements for the year ended June 30, 2013

## Accounting Policies

---

### 1.5 Impairment of cash-generating assets (continued)

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets held with the primary objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash-generating unit is the higher its fair value less costs to sell and its value in use.

Useful life is either:

- (a) the period of time over which an asset is expected to be used by the municipality; or
- (b) the number of production or similar units expected to be obtained from the asset by the municipality.

Criteria developed by the municipality to distinguish cash-generating assets from non-cash-generating assets are as follow:

### 1.6 Employee benefits

Employee benefits are all forms of consideration given by an entity in exchange for service rendered by employees.

A qualifying insurance policy is an insurance policy issued by an insurer that is not a related party (as defined in the Standard of GRAP on Related Party Disclosures) of the reporting entity, if the proceeds of the policy can be used only to pay or fund employee benefits under a defined benefit plan and are not available to the reporting entity's own creditors (even in liquidation) and cannot be paid to the reporting entity, unless either:

- the proceeds represent surplus assets that are not needed for the policy to meet all the related employee benefit obligations; or
- the proceeds are returned to the reporting entity to reimburse it for employee benefits already paid.

Termination benefits are employee benefits payable as a result of either:

- an entity's decision to terminate an employee's employment before the normal retirement date; or
- an employee's decision to accept voluntary redundancy in exchange for those benefits.

Other long-term employee benefits are employee benefits (other than post-employment benefits and termination benefits) that are not due to be settled within twelve months after the end of the period in which the employees render the related service.

Vested employee benefits are employee benefits that are not conditional on future employment.

Composite social security programmes are established by legislation and operate as multi-employer plans to provide post-employment benefits as well as to provide benefits that are not consideration in exchange for service rendered by employees.

A constructive obligation is an obligation that derives from an entity's actions where by an established pattern of past practice, published policies or a sufficiently specific current statement, the entity has indicated to other parties that it will accept certain responsibilities and as a result, the entity has created a valid expectation on the part of those other parties that it will discharge those responsibilities.

Financial Statements for the year ended June 30, 2013

## Accounting Policies

---

### 1.6 Employee benefits (continued)

#### Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits include items such as:

- wages, salaries and social security contributions;
- short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the absences is due to be settled within twelve months after the end of the reporting period in which the employees render the related employee service;
- bonus, incentive and performance related payments payable within twelve months after the end of the reporting period in which the employees render the related service; and
- non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cellphones) for current employees.

When an employee has rendered service to the entity during a reporting period, the entity recognise the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

- as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the undiscounted amount of the benefits, the entity recognise that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The entity measure the expected cost of accumulating compensated absences as the additional amount that the entity expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The entity recognise the expected cost of bonus, incentive and performance related payments when the entity has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the entity has no realistic alternative but to make the payments.

#### Post-employment benefits

Post-employment benefits are employee benefits (other than termination benefits) which are payable after the completion of employment.

Post-employment benefit plans are formal or informal arrangements under which an entity provides post-employment benefits for one or more employees.

Multi-employer plans are defined contribution plans (other than state plans and composite social security programmes) or defined benefit plans (other than state plans) that pool the assets contributed by various entities that are not under common control and use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the entity that employs the employees concerned.

### 1.7 Provisions and contingencies

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

# Jozini Local Municipality

(Registration number KZ272)

Financial Statements for the year ended June 30, 2013

## Accounting Policies

---

### 1.7 Provisions and contingencies (continued)

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating deficits.

If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 27.

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

Loan commitment is a firm commitment to provide credit under pre-specified terms and conditions.

The municipality recognises a provision for financial guarantees and loan commitments when it is probable that an outflow of resources embodying economic benefits and service potential will be required to settle the obligation and a reliable estimate of the obligation can be made.

Determining whether an outflow of resources is probable in relation to financial guarantees requires judgement. Indications that an outflow of resources may be probable are:

- financial difficulty of the debtor;
- defaults or delinquencies in interest and capital repayments by the debtor;
- breaches of the terms of the debt instrument that result in it being payable earlier than the agreed term and the ability of the debtor to settle its obligation on the amended terms; and
- a decline in prevailing economic circumstances (e.g. high interest rates, inflation and unemployment) that impact on the ability of entities to repay their obligations.

Where a fee is received by the municipality for issuing a financial guarantee and/or where a fee is charged on loan commitments, it is considered in determining the best estimate of the amount required to settle the obligation at reporting date. Where a fee is charged and the municipality considers that an outflow of economic resources is probable, an municipality recognises the obligation at the higher of:

- the amount determined using in the Standard of GRAP on Provisions, Contingent Liabilities and Contingent Assets; and
- the amount of the fee initially recognised less, where appropriate, cumulative amortisation recognised in accordance with the Standard of GRAP on Revenue from Exchange Transactions.

### 1.8 Revenue

Revenue comprises gross inflows of economic benefits or service potential received and receivable by a municipality, which represents an increase in net assets, other than increases relating to contributions from owners.

Conditions on transferred assets are stipulations that specify that the future economic benefits or service potential embodied in the asset is required to be consumed by the recipient as specified or future economic benefits or service potential must be returned to the transferor.

Control of an asset arise when the municipality can use or otherwise benefit from the asset in pursuit of its objectives and can exclude or otherwise regulate the access of others to that benefit.

Exchange transactions are transactions in which one entity receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of cash, goods, services, or use of assets) to another entity in exchange.

# Jozini Local Municipality

(Registration number KZ272)

Financial Statements for the year ended June 30, 2013

## Accounting Policies

---

### 1.8 Revenue (continued)

Expenses paid through the tax system are amounts that are available to beneficiaries regardless of whether or not they pay taxes.

Fines are economic benefits or service potential received or receivable by entities, as determined by a court or other law enforcement body, as a consequence of the breach of laws or regulations.

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, an municipality either receives value from another municipality without directly giving approximately equal value in exchange, or gives value to another municipality without directly receiving approximately equal value in exchange.

Restrictions on transferred assets are stipulations that limit or direct the purposes for which a transferred asset may be used, but do not specify that future economic benefits or service potential is required to be returned to the transferor if not deployed as specified.

Stipulations on transferred assets are terms in laws or regulation, or a binding arrangement, imposed upon the use of a transferred asset by entities external to the reporting municipality.

Tax expenditures are preferential provisions of the tax law that provide certain taxpayers with concessions that are not available to others.

The taxable event is the event that the government, legislature or other authority has determined will be subject to taxation.

Taxes are economic benefits or service potential compulsorily paid or payable to entities, in accordance with laws and or regulations, established to provide revenue to government. Taxes do not include fines or other penalties imposed for breaches of the law.

Transfers are inflows of future economic benefits or service potential from non-exchange transactions, other than taxes.

### 1.9 Impairment of assets

The municipality assesses at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Irrespective of whether there is any indication of impairment, the municipality also:

- tests intangible assets with an indefinite useful life or intangible assets not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed during the annual period and at the same time every period.

If there is any indication that an asset may be impaired, the recoverable service amount is estimated for the individual asset. If it is not possible to estimate the recoverable service amount of the individual asset, the recoverable service amount of the cash-generating unit to which the asset belongs is determined.

The recoverable service amount of an asset or a cash-generating unit is the higher of its fair value less costs to sell and its value in use.

If the recoverable service amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. That reduction is an impairment loss.

The capitalisation of borrowing costs commences when all the following conditions have been met:

- expenditures for the asset have been incurred;
- borrowing costs have been incurred; and
- activities that are necessary to prepare the asset for its intended use or sale are undertaken.

## Accounting Policies

---

### 1.10 Unauthorised expenditure

Unauthorised expenditure is expenditure that has not been budgeted, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, municipality or organ of state and expenditure in the form of a grant that is not permitted in terms of the Municipal Finance Management Act (Act No.56 of 2003). Unauthorised expenditure is accounted for as an expense in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance

### 1.11 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

### 1.12 Irregular expenditure

Irregular expenditure as defined in section 1 of the PFMA is expenditure other than unauthorised expenditure, incurred in contravention of or that is not in accordance with a requirement of any applicable legislation, including -

- (a) this Act; or
- (b) the State Tender Board Act, 1968 (Act No. 86 of 1968), or any regulations made in terms of the Act; or
- (c) any provincial legislation providing for procurement procedures in that provincial government.

National Treasury practice note no. 4 of 2008/2009 which was issued in terms of sections 76(1) to 76(4) of the PFMA requires the following (effective from 1 April 2008):

Irregular expenditure that was incurred and identified during the current financial and which was condoned before year end and/or before finalisation of the financial statements must also be recorded appropriately in the irregular expenditure register. In such an instance, no further action is also required with the exception of updating the note to the financial statements.

Irregular expenditure that was incurred and identified during the current financial year and for which condonement is being awaited at year end must be recorded in the irregular expenditure register. No further action is required with the exception of updating the note to the financial statements.

Where irregular expenditure was incurred in the previous financial year and is only condoned in the following financial year, the register and the disclosure note to the financial statements must be updated with the amount condoned.

Irregular expenditure that was incurred and identified during the current financial year and which was not condoned by the National Treasury or the relevant authority must be recorded appropriately in the irregular expenditure register. If liability for the irregular expenditure can be attributed to a person, a debt account must be created if such a person is liable in law. Immediate steps must thereafter be taken to recover the amount from the person concerned. If recovery is not possible, the accounting officer or accounting authority may write off the amount as debt impairment and disclose such in the relevant note to the financial statements. The irregular expenditure register must also be updated accordingly. If the irregular expenditure has not been condoned and no person is liable in law, the expenditure related thereto must remain against the relevant programme/expenditure item, be disclosed as such in the note to the financial statements and updated accordingly in the irregular expenditure register.

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

### 1.13 Budget information

Municipality are typically subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

# Jozini Local Municipality

(Registration number KZ272)

Financial Statements for the year ended June 30, 2013

## Accounting Policies

---

### 1.13 Budget information (continued)

General purpose financial reporting by municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on a cash basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 7/1/2012 to 6/30/2013.

The budget for the economic entity includes all the entities approved budgets under its control.

The financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

### 1.14 Retirement benefits

The municipality provides retirement benefits for its employees and councillors. The contributions to fund obligations for the payment of retirement benefits are charged against revenue in the year they become payable. The defined benefit funds, which are administered on a provincial basis, are actuarially valued triennially on the projected unit credit method basis. Deficits identified are recognised as a liability and are recovered through lump sum payments or increased future contributions on a proportional basis to all participating municipalities.

Specific actuarial information in respect of individual participating municipalities is unavailable due to centralised administration of these funds. As a result, defined benefit plans have been accounted for as if they were defined contribution plans.

	<b>21,446,239</b>	<b>21,368,658</b>

## 12. Fair value adjustment relating to Property, Plant & Equipment

The management is using the Cost Model and in the current year Property, Plant and Equipment have been verified and were adjusted at fair value after necessary condition assessment had been completed by an Independent Valuer Pradeep Ramlal, the Director of AB Projects. This was performed to fully comply with GRAP 17 as previously Directive 4 was being used.

Opening balance	36,954,011	-
Movement this year	10,798,194	36,954,011
	<b>47,752,205</b>	<b>36,954,011</b>

Revaluation of halls that were not falling into the Municipal books have been handed over by Tribal Authorities and have been fair value hence R47 752 205 is made up of R36 954 011 revaluation surplus plus 10 798 194 fair value adjustment for halls.

## Notes to the Financial Statements

Figures in Rand 2013 2012

### 16. Government grants and subsidies (continued)

**1,203,736 385,510**

There were delays in finalising the agreement between the Municipality and DSR which resulted in the procurement process only being finalised in June 2013. The project is now underway and is due for completion in October as per the SLA and project schedule. Permission has since been received from DSR to roll over the unspent grant into the 2013/2014 financial year.

#### Establishment of internal control unit

Balance unspent at beginning of year 150,000 150,000

The project has been completed and an application has been submitted to COGTA to utilise the balance of the funds for the project of a similar nature

#### Ward committee induction training

Balance unspent at beginning of year 23,355 23,355

This project has been completed and an application has been submitted to COGTA to utilise the balance of the funds for a project of a similar nature

#### Municipal housing sector plan

Balance unspent at beginning of year 11,775 11,775

This project has been completed and an application has been submitted to COGTA to utilise the balance of the funds for a project of a similar nature

#### Jozini upgrading project

Balance unspent at beginning of year 107,606 107,606

This project has been completed and an application has been submitted to COGTA to utilise the balance of the funds for a project of a similar nature

#### Jozini value adding centre

Balance unspent at beginning of year	647,210	647,210
Current-year receipts	1,000,000	-
Conditions met - transferred to revenue	(780,196)	-
	<b>867,014</b>	<b>647,210</b>

The balance of the funding is to be used for the investigation of an alternative energy source to support the JVAC, appointment of mentor for JVAC farmers on the operation of JVAC as well as the procurement of equipment to operationalise the JVAC. The new project schedule indicates that the outstanding project deliverables are due for completion at the end of December 2013.

#### Bhambanana town formalisation

Balance unspent at beginning of year 69,365 69,365

The project has been completed and an application has been submitted to COGTA to utilise the balance of the funds for the project of a similar nature.

#### Synergistic programme

Financial Statements for the year ended June 30, 2013

## Notes to the Financial Statements

Figures in Rand 2013      2012

### 16. Government grants and subsidies (continued)

Balance unspent at beginning of year 10,730      10,730

The project has been completed and an application has been submitted to COGTA to utilise the balance of funds for the project of a similar nature.

#### LG expert

Balance unspent at beginning of year 22,384      22,384

The project has been completed and an application has been submitted to COGTA to utilise the balance of the funds for the project of a similar nature.

#### Jozini town formalisation Nodal town expansion and Jozini street lighting

Balance unspent at beginning of year	1,270,987	1,270,987
Current-year receipts	3,500,000	-
Other	(849,235)	-
	<b>3,921,752</b>	<b>1,270,987</b>

There were delays in finalising the funding agreement between the municipality and COGTA which resulted in procurement processes only being finalised in April 2013. Both projects namely Nodal expansion and street lighting are now underway and nodal expansion projects are due for completion in October as per the SLA and project schedule and street lighting project due for completion on 30 June 2014 since surveys have been completed and now busy with design stage. Permissions have since been received from COGTA to roll over the unspent grant into 2013/2014 financial year.

#### DBSA contribution

Balance unspent at beginning of year 10,365      10,365

The project has been completed and an application has been submitted to COGTA to utilise the balance of the fund for the project of a similar nature

#### Implementation of pound

Balance unspent at beginning of year	850,312	850,312
Conditions met - transferred to revenue	(775,558)	-
	<b>74,754</b>	<b>850,312</b>

The construction of the animal pound has now been completed an application to rollover and utilise the balance of the fund for the operational requirements of the pound during the 2013/2014 financial year has since been received from COGTA

#### Supply of water,solar, gyser

Balance unspent at beginning of year	2,665,199	2,665,199
Current-year receipts	1,400,000	-
Other	(1,753,097)	-
	<b>2,312,102</b>	<b>2,665,199</b>

The project is completed and the project manager is due to submit the close out report. An application is to be submitted to DME to utilise the balance remaining on the project..

## Notes to the Financial Statements

Figures in Rand 2013 2012

### 28. Prior year error

As disclosed in the previous financial year 2011/2012 the total net asset amount to 148 251 493 has erroneously been calculated to 148 209 984 due to a casting error. This has been subsequently adjusted and restated in the 2012/2013 financial year

The effect on the adjustment is as follows:

#### Statement of financial position

Prior year Amount	148,209,984	-
Add: adjustment	41,509	-
	<b>148,251,493</b>	<b>-</b>

As disclosed in the previous financial year 2011/2012 the accumulated surplus amount to 111 297 482 has erroneously been calculated as to 148 209 984 due to a casting error. This has been subsequently adjusted and restated in the 2012/2013 financial year

#### Accumulated Surplus

Opening balance as disclosed 2011/2012	148,209,984	-
Less: adjustment	(36,912,502)	-
	<b>111,297,482</b>	<b>-</b>

During the year ended 30 June 2012, the installation of gysers were erroneously capitalised as assets instead of being expensed as it does not meet the definition of the asset as per GRAP 17

The comparative amount has been restated as follows

Debit expense: Solar, water, gysers	1,753,097	-
Credit Asset: Solar, water, gyser	(1,753,097)	-
	-	-

Correction of an error on Long service award which was erroneously omitted during the 2011/ 2012 financial year. Evaluation on the the liability for long service have been calculated by the actuaries as disclosed in the actuarial report. The present value of the funded obligations is R780 000.00

The movements in the defined benefit obligations have been consequently restated as follows

#### Long Service awards

Balance at the beginning of the year	618,000	449,000
Current service & interest cost	169,000	169,000
Benefit payment	(13,000)	-
Actuarial ( gain)/ losses	6,000	-
	<b>780,000</b>	<b>618,000</b>

### 29. Unauthorised expenditure

Unauthorised expenditure	1,285,023	1,285,023
